GIYOKON Guillotine Glass Balcony System

System; It moves vertically at the bottom of the wing structure, provides easy use with a panoramic view and a removable feature, thanks to the opening scissors. It is superiorly secure with its espagnolette double locking equipment. It is suitable for use in your architectural structures where you attach importance to aesthetics and security. This new System has many advantages. The wingspan position can be used at any desired rate with the automation feature with a silent motor operated and used by remote control. This system has high carrying capacity and a thick-toothed steel chain hidden in the side profiles and an alternative 10-row steel rope trigger; Winter garden, Veranda, Pergola Awning, Terrace, Shop, Showcase, Pool, Balcony, Window, Room Partition etc. You can easily close your areas both safely and aesthetically, and now use these areas as a room.

New Generation Guillotine System GIYOKON

The vertically opening system is very suitable for the safety of children, disabled and elderly people when used fully automatically. Our system, which provides heat and sound insulation when closed, becomes a glass railing (handrail) when it is turned to the open position. The glasses can be kept in the desired position, or the number of glasses can be applied as (1+2).(1+3) depending on your size and the situation of your project. This system will give you confidence with its 8mm and 4+16+4 double glazing and tempered glass alternatives. You can request our Guillotine System in the RAL colors you want, with anodized surface treatment or wood processing. At the same time, our system is max. height 4000 mm and max. We can design projects up to 4000 mm.

Isikon System 30mm

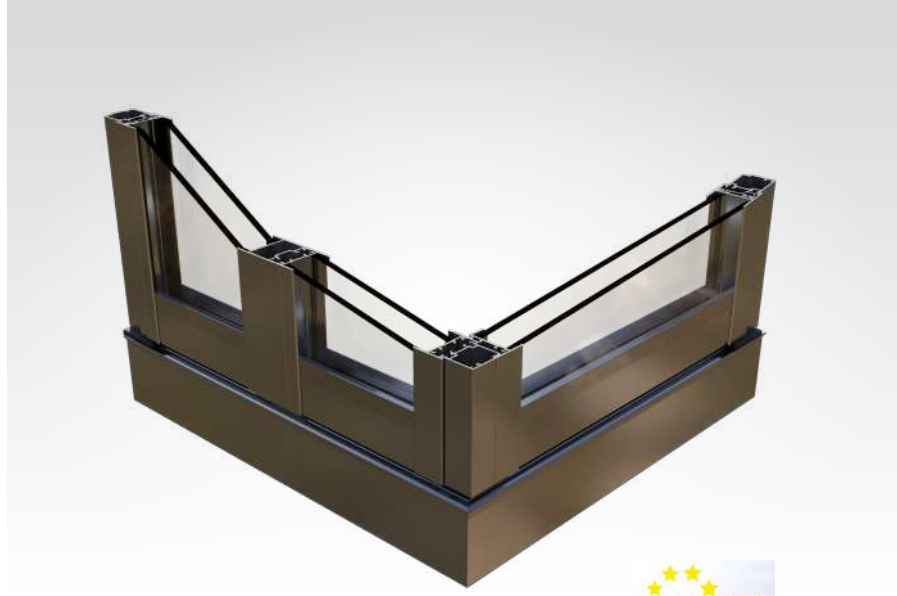

Double Glazed Balcony System

New Generation Insulated Glass Balcony ISIKON !

Alkon is one of the leading suppliers of glass balcony systems with high quality aluminium. Alkon products are used millions of times worldwide and meet the highest demands in terms of design, comfort, safety and energy savings.

Espagnolette Lock System

Alkon espagnolette lock provides security and comfort thanks to its 3-point non-stretching steel pins. In addition to offering an ethical solution against theft, it has an aesthetic appearance. You are safe with Alkon.

Insulated double glazed sliding folding glass balcony system, 30 mm (4 + 22 + 4) roped on four sides, decorated with tempered glass and system profiles. Low noise in the functionality, wing profiles with high resistance to wear and cold heat are designed so that they can be opened to the inside and open depending on the balcony structure and your desire to the left or right. ISIKON is compatible with, Flat and all grade balconies.

ISIKON Curtain Applications

Thanks to its superior features, the Isikon guide router works without interfering with the use of curtains by automatically closing. Isikon has a wide range of curtain applications. It is fully compatible with blinds and spring roller blinds. In addition to the curtain application, Isikon is compatible with all optional glass types thanks to comfort glass and reflective glasses that block sunlight.

ISIKON Water Blocking Barrier Dropper System

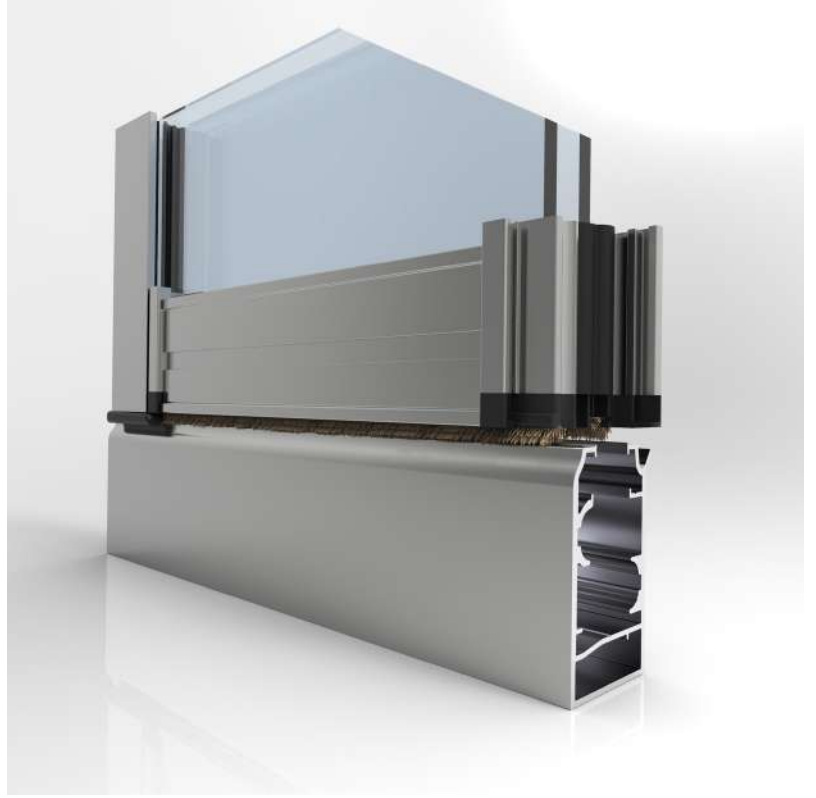

This system discharges rainwater and liquids formed by steam the inclined dropper water outlet.

With water drainage and sloping flooring, your glass balconies are designed to minimize the ingress of water. Between the aluminum wings you have both thermal and acoustic insulation as well as a longterm investment. In our system, the Glass joint is woven with Aluminium routing, hair wick and epdm gasket. We have the ability to adjust the diameter with our customization profiles. This completes your visualization. When you collect the wings, we have a mounting attachment that prevents the wings from moving involuntarily.

The Isikon+Plus insulating glass series is designed with a difference of %50 thermal insulation compared to 8mm glass balconies. The Isikon+Plus Insulating Glass Series has insulating devices in combination with insulating glass panels, 6-point insulating brush, EPDM sealing pressure and insulating devices. ISIKON PLUS SERIES Holds the balconies with 4+16+4 double glazing at room temperature. The ISIKON+Plus SERIES reduces glass reflections to zero by locking them from 3 points with Espagnolette locking. You can use Isikon+Plus Series Window as you open and close. Isikon+Plus can be adapted with 8-10mm Glass with its Optional Profile used in Balcony System.
